Summary

Full-Stack Developer building complete web applications, from modern React/Next.js interfaces to backend systems with Express.js and NestJS, databases, background processing, and AI-powered features. Enjoy working across the full stack, with a particular interest in backend systems, application architecture, APIs, and system design.

Professional Experience

Web Development Intern, *University of New York Tirana (UNYT)* 02/2025 – 07/2025
Tirana, Albania

- Contributed to **MedReserve**, a medical appointment booking web application, improving the frontend booking flow and overall usability.
- Implemented **dynamic service-to-doctor filtering and data-driven rendering with JavaScript**, reducing hardcoded frontend content.
- Improved page performance with **lazy-loaded images** and contributed and integrated changes within an existing **Git-based codebase**.

Education

Bachelor in Computer Science, *University of New York Tirana (UNYT)* 2023 – 2026
Tirana, Albania

Technical Skills

Languages TypeScript, JavaScript, SQL	Frontend React, Next.js, Tailwind CSS
Backend Node.js, Express.js, NestJS, REST APIs	Data PostgreSQL, Prisma, Supabase, MongoDB, Redis
Infrastructure & Tools Docker, BullMQ, Sentry, Git	Testing & CI/CD Vitest, Playwright, GitHub Actions

Projects

BugTriage AI 📄, *Next.js, TypeScript, Prisma, PostgreSQL, pgvector, Redis, BullMQ, Gemini AI, Vercel AI SDK*

- Built an AI-powered issue triage platform that helps teams analyze incoming issues, identify semantic duplicates, and organize work across multi-tenant workspaces, deployed on Vercel.
- Designed asynchronous background processing with Redis/BullMQ, worker retries, transactional outbox dispatch, pgvector-based similarity search, private attachments, and GitHub Issues export.

DeliverFlow 📄, *Next.js, TypeScript, PostgreSQL, Drizzle ORM, Supabase, Tailwind CSS*

- Built a client delivery portal that centralizes projects, tasks, milestones, files, payments, feedback, and approvals across separate owner and client workspaces, deployed on Vercel.
- Implemented secure role-based access, Supabase RLS, private file storage with signed URLs, workspace-scoped data, notifications, analytics, and automated payment reminders.
